NEC Interactive Software (NP01SW)
Setup Guide

1. What is needed?
   a. Mac (Mac OS X Snow Leopard or better) or PC (Windows XP, Vista or 7)
   b. Apple iPad or iPad2
   c. NEC projector - can be connected via VGA/HDMI/DisplayPort/RGBHV or via a wired/wireless network (projector must have this capability). See projector user manual for confirmation of connection types available.
   d. Network – must create local network or placed on the internal company network
   e. Computer needs Java installed to run the NEC Interactive Software dashboard

2. Hardware configuration
   a. Connecting a Mac or PC to the network
      i. Follow instructions based on the operating system you are using
   b. Connecting the NEC projector to the network
      i. Follow the instructions as outlined in your projector's user manual

3. Wireless setup of iPad
   a. Turn on iPad
   b. Touch the Settings icon
   c. In the Settings screen, touch the Network arrow key
   d. Touch the SSID name of the network to which you want to connect. If it is a secured wireless network, follow the instructions to enter the shared keys or password. If a public wireless network is available to which you want to connect, simply touch it to connect. Note: The computer, projector and iPad must be on the same network for proper connection

4. Install Software
   a. Installing NEC Interactive Software
      i. Software is located on the supplied USB thumb drive
      ii. For PC: Click on the file "NEC Interactive Desktop Setup 1.2.11.exe" and follow the prompts
      iii. For Mac: Click on file "NEC Interactive Desktop 1.2.11.dmg" and follow the prompts
   b. Installing NEC Image Express
      i. Software is located on the supplied USB thumb drive
      ii. For PC:
         1. XP: Click on the file "IEU20XP.exe" and follow the prompts
         2. Vista/7: Click on the file "IEU20Vista.exe" and follow the prompts
      iii. For Mac:
         1. Intel: Click on the file "ieu2_Intel_1_2_6_110_dmg.zip" to unzip. Then click on the file "Image Express Utility 2 (Intel).dmg" and follow the prompts.
         2. Power PC: Click on the file "ieu2_PPC_1_2_6_110_dmg.zip" to unzip. Then click on the file "Image Express Utility 2.dmg" and follow the prompts.
